**RISKS** - The Fund is subject to stock market risk, meaning stocks in the Fund may fluctuate in response to developments at individual companies or due to general market and economic conditions. Also, because the Fund generally invests in 15 to 25 companies, share value could fluctuate more than if a greater number of securities were held. Investing in non-US securities may entail risk due to non-US economic and political developments, exposure to non-US currencies, and different accounting and financial standards. These risks may be higher when investing in emerging markets.

The FTSE Developed ex North America Index comprises Large and Mid-cap stocks providing coverage of Developed markets, excluding the US and Canada. The index is derived from the FTSE Global Equity Index Series (GEIS), which covers 98% of the world's investable market capitalization. An index cannot be invested in directly.
